About

Capability

*Clarke Chapman Manufacturing is a subsidiary of The Clarke Chapman Group Ltd, part of Langley Holdings plc, a privately controlled UK engineering group with regional offices in the Americas, Europe, China, Asia and Australia.*

*The Clarke Chapman Group incorporates Cowans Sheldon, Mackley Pumps, RB Cranes, Stothert & Pitt and Wellman Booth, all well-established names in the materials handling business. All around the world, cranes and equipment manufactured and supplied by these companies, are in daily operation in railways, construction sites, military establishments, offshore installations, ports and steel plants. Supporting these products, and other manufacturers' equipment, are Clarke Chapman Services in the installation, refurbishment and relocation of equipment and Clarke Chapman Facilities Management who provide a bespoke facilities management service, enabling clients to concentrate on their core business.*

The Clarke Chapman Manufacturing (CCM) plant is located in Gateshead in the North East of England. Situated on a 4.6 hectares site with 15,000m<sup>2</sup> of manufacturing space and close to major roads and ports, CCM has built a worldwide reputation for manufacturing and build-to-print services to a multitude of clients in the renewable energy, military, marine, steel, nuclear power, and waste handling sectors. CCM's assembly and machining shops are amongst the best-equipped in the business, fully supported by qualified engineers who see each project through from

its inception to the delivery of the finished product, maintaining vital contact with the customer at every stage of the process.

CCM's capability includes the procurement of materials and components, manufacture, assembly, functional testing and commissioning, and where necessary, installation on site.

CCM often work closely with Design houses, Project Management Companies, Original Equipment Manufacturers and Contractors, who are looking for the facility and the resources to fulfil their contract obligations.

*'...flexibility, resourcefulness and experience...'*

## Skills & Resource

### AREA 3.581 HECTARES

|               |       |
|---------------|-------|
| Works         | 1.620 |
| External area | 1.850 |
| Offices       | 0.111 |

### WORKSHOPS (metres)

|                |        |
|----------------|--------|
| Machine Shop   |        |
| length         | 167    |
| width          | 23.50  |
| sq metres      | 3935   |
| cranes tonnes  | 3 x 10 |
| ht. below hook | 8.50   |

### Fitting Shop

|                |        |
|----------------|--------|
| length         | 213    |
| width          | 23.50  |
| sq metres      | 5008   |
| cranes tonnes  | 4 x 10 |
| ht. below hook | 8.00   |

### Fitting Shop

|                |                |
|----------------|----------------|
| length         | 122            |
| width          | 18             |
| sq metres      | 2228           |
| cranes tonnes  | 2 x 50, 1 x 10 |
| ht. below hook | 15.25          |

### TEST FACILITIES

Testing facilities are available for load, mechanical, electrical and hydraulic tests

### EXTERNAL AREA

#### 1.85 HECTARES

Adjacent to the workshops and available for assembly and test of major assemblies.

As an established manufacturer of specialist cranes and materials handling equipment, CCM's multi-discipline workforce provide all the skills and expertise in structural assembly, mechanical, electrical, hydraulic, pneumatic and instrumentation. These disciplines have transcended over the years to cover every conceivable market sector satisfying all our customers' needs. When required, CCM can call upon its' sister companies to provide additional support in design and contracting services.

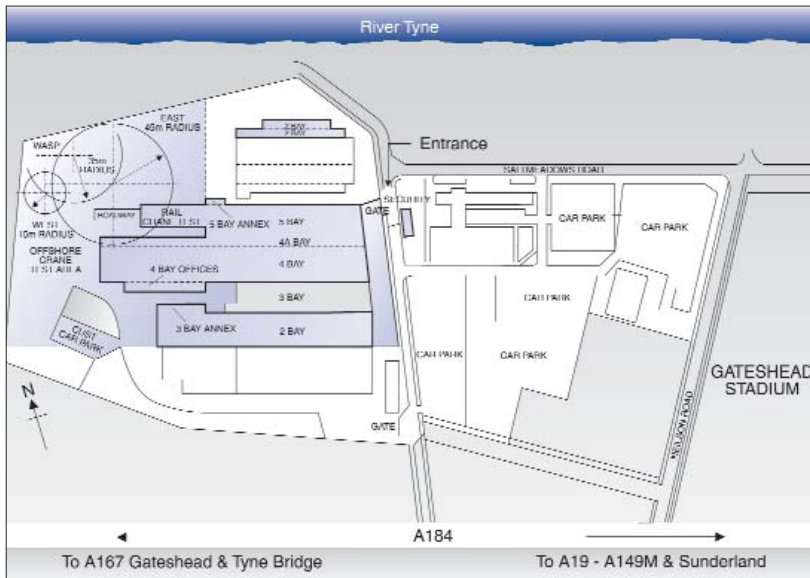

Flexibility, resourcefulness, and experience are just some of the

reasons why Clarke Chapman Manufacturing are a vital partner for cost effective and practical, engineering solutions.

## Site Facilities

### Quality

Everything we do at Clarke Chapman Manufacturing (CCM) is to the highest standards - Quality is a way of life - we build equipment that endures some of the harshest and arduous environments on earth

CCM is accredited to BS EN ISO 9002 - 2000. The design and

contracting businesses within the Clarke Chapman Group of companies are accredited to BS EN ISO 9001 - 2000 whose resources are made available to CCM when required.

### Project Management

CCM's Project Managers are experienced in meeting customers' objectives in terms of quality, time and cost. Each project is carefully managed from planning and resource management through to cost and documentation control.
