

JOB DESCRIPTION

Responsible to the Supervisor at the relevant site, the main duties of the Service Engineer will be:

- To undertake the maintenance and repair of rail freight wagons and associated equipment at the relevant site and occasionally at other Network Rail sites and depots throughout the UK.
- Carryout maintenance activities in accordance with company and customers standards and procedures.
- Investigate failures, diagnose faults, and undertake rectification to prevent recurrence of problem.
- Reporting all maintenance faults and repairs in accordance with company and customers procedures and standards.
- Working in all types of climate conditions following rail delivery units.
- A full job description outlining the main duties of the role will be issued with the application pack.

EXPERIENCE AND KEY COMPETENCIES:

Ideally to have:

- A comprehensive engineering/maintenance background.
- Experience of rolling stock maintenance and repairs.
- Working knowledge of ISO 9002 Quality Systems and ISO 14000 series Environmental Practice.
- Experience of electric, plc, hydraulic, pneumatic, mechanical and diesel equipment would be an advantage.
- Ability to maintain, identify and source problems and to provide requisite repair.
- Knowledge of customer care practices.
- Good communication skills.
- Working as part of a multi-disciplined team.

QUALIFICATIONS

- Served a recognised Apprenticeship in an engineering discipline and will have achieved a minimum of NVQ Level 3 diploma or equivalent.
- Full valid driving licence.
